*Thank you for visiting our site.*

*This “Right Click” Example shows how you can use that link to “Open”, “Open in New Window”, “Save Target As” and “Print Target”.*

*“Open” and “Open in New Window” actually open the document in Adobe Reader, where you can also print it using Adobe.*

*“Open in New Window” is easiest to DISPLAY and/or PRINT the Item and then close the small window when you’re finished!*

*“Save Target As” can be used to SAVE the Adobe “PDF” file on your internal or CD drives.*

*“Print Target” can be used to PRINT the Adobe File directly and brings up your computer’s “PRINT” Function to Select a printer and so forth WITHOUT Displaying the File!*

*Hopefully this will help you collect data you want EFFICIENTLY.*
